FOR IMMEDIATE RELEASE

Holland Hospital Earns MRI Accreditation

HOLLAND – Holland Hospital’s Radiology and Imaging Services recently earned MRI (Magnetic Resonance Imaging) Accreditation from the American College of Radiology (ACR), becoming the only hospital that is ACR accredited for MRI services in Ottawa County.

“The ACR conducts a rigorous process to determine if hospitals meet or exceed national standards for medical imaging and radiation therapy treatments,” says Michael Stock, Radiology and Imaging Services director. “This accreditation tells patients and physicians that Holland Hospital has voluntarily been reviewed by board-certified radiologists and medical physicists who are experts in the field. We are very proud of our team’s diligent work to secure this endorsement.”

The accreditation confirms that the hospital’s MRI services are provided by qualified staff, the equipment is appropriate and the hospital meets or exceeds quality assurance and safety guidelines.
